THE TORNADO.

It Sweeps Over Central Iowa

A Magazine Spring Edition - A Distinctly Millennial Feature

AUGUSTA, IOWA, APRIL 22.

The storm which struck Central Iowa last evening was the most disastrous ever known in that part of the state. It caused enormous destruction and loss of life.

The tornado was first observed near town of Charles, about 10 miles southwest of Philo, at about 4:30 p.m. It was accompanied by a strong wind, which blew down trees and buildings, and caused much destruction. The storm lasted for about an hour, causing widespread damage.

The storm hit the town of Charles, destroying many buildings, including the courthouse and the post office. It also destroyed several barns and homes in the vicinity.

Many people were injured, and six fatalities were reported. One man was killed when a barn collapsed on him, and another was killed by a falling tree.

The town of Charles was severely affected, with many buildings, including the courthouse and the post office, destroyed. The风暴 also caused extensive damage to the countryside, with many buildings and homes destroyed.

Reports indicate that the storm was caused by a combination of high winds and low pressure, creating ideal conditions for the formation of a tornado.

Efforts are underway to provide assistance to the victims of the storm, with local and state officials working to assess the damage and provide aid.
